

SDB CoRe Logo Design Contest

The Society for Developmental Biology Collaborative Resources is launching a Logo Design Contest. SDB CoRe is an online reference database of images, movies, diagrams, and brief articles that illustrate key concepts in developmental biology. This community-based project debuting in the summer of 2011 will provide easy-access to great visuals for learning and teaching. The SDB CoRe logo should represent the diversity of plant and animal species studied in developmental biology. It may also represent the community or collaborative nature of this project. It is important that the letters “SDB” and “CoRe” be incorporated into the design. Designers may work off the color scheme and/or design of the current SDB logo if they so desire. The contest winner will receive free registration for the 2011 SDB Meeting in Chicago.

Eligibility: Contestants must be SDB members in good standing for consideration. Please submit both a TIFF and PDF file of the design to mlucas@sdbonline.org by November 15, 2010.
