Mission
The Society for Developmental Biology (SDB) Choose Development! Program aims to increase the diversity of undergraduate students that enter doctoral programs in pursuit of research careers in developmental biology.

Overview
• 10 weeks of developmental biology research in an SDB member lab
• Support from team of mentors
• Networking with developmental biology community
• Participation in local campus summer research program
• Present summer research at SDB annual meeting in 2022
• Opportunity to return multiple summers
• $5000 stipend

What is Developmental Biology?
The study of how plants and animals grow and develop from a single cell to multicellular organisms.

Eligibility
• Undergraduate student from underrepresented minority group, first generation college student, or undergraduate student with a disability
• U.S. or Canadian citizen or permanent resident
• Interest in developmental biology

Application Requirements
• Online application at: www.sdbonline.org/choose_development
• Additional Requirements
  ▪ Transcript
  ▪ One Letter of Recommendation

Application Deadline:
February 15, 2021
