Society for Developmental Biology
Choose Development! Program
Summer Research in Developmental Biology

**Mission**
The Society for Developmental Biology (SDB) Choose Development! Program aims to increase the diversity of undergraduate students that enter doctoral programs in pursuit of research careers in developmental biology.

**Overview**
- 10 weeks of developmental biology research in SDB member lab
- Support from team of mentors
- Networking with developmental biology community
- Participation in local campus summer research program
- Present summer research at SDB annual meeting in 2020
- Opportunity to return multiple summers
- $4000 stipend

**Research Areas:**
- Differentiation
- Pattern Formation
- Organogenesis
- Evolution
- Ecology & Development
- Stem Cells
- Regeneration
- Birth Defects

**What is Developmental Biology?**
The study of how plants and animals grow and develop from a single cell to multicellular organisms.

**Application Requirements**
- Online application at: [www.sdbonline.org/choose_development](http://www.sdbonline.org/choose_development)
- Additional Requirements
  - Official Transcript
  - One Letter of Recommendation

**Application Deadline:**
February 15, 2019

**Eligibility**
- Undergraduate student from underrepresented minority group or undergraduate student with a disability
- U.S. or Canadian citizen or permanent resident
- Interest in developmental biology
